<p><u>Outpatient Flexi-MediSave</u></p>	<p>\$200 per patient per year</p> <p>Only the patient's MediSave or the patient's spouse's MediSave may be used.</p> <p><i>Note: Both the patient and the spouse need to be 60 years old or older.</i></p>

*You may use your MediSave to pay for your other dependants' (e.g. aunts') outpatient treatments incurred at public hospitals/ medical clinics, subject to eligibility conditions. For example, the patient must be a dependant of the MediSave Account (MA) holder who is still actively making contributions, and the patient has exhausted his own and his spouse, children, parents, grandchildren and siblings' MAs. The same prevailing withdrawal limits apply.

If you wish to find out if you are eligible to use your MediSave to pay for your other dependants' subsidised approved outpatient treatments at a public hospital or government polyclinics, you need to approach the staff at the hospital's Business Office or the polyclinic.

Information is correct as at 1 October 2019.
