## EXAMPLE A - CALCULATION OF GAIN (LOSS) FOR SHARES USING THE WEIGHTED AVERAGE COST METHOD

1. Discounted ST shares (ST A and ST 2)

| No. of Shares bought / received | Cumulative Qty <br> (No. of Shares) <br> A | Cumulative <br> Cost (\$) <br> B | Weighted <br> Average Cost (\$) <br> B / A |
| :--- | :--- | :--- | :--- |
| Dec 1993. <br> Bought 600 ST A shares @ \$1.90. | 600 | 1,140 | 1.9000 |
| Nov 1994. <br> Received 60 ST A Loyalty shares. | 660 | 1,140 | 1.7273 |
| Nov 1995. <br> Received 60 ST A Loyalty shares. | 720 | 1,140 | 1.5833 |
| Aug 1996. <br> Bought 500 ST2 shares @ \$2.50. | 1,220 | 2,390 | 1.9590 |
| Nov 1997. <br> Received 60 ST A \& 50 ST2 Loyalty <br> shares. | 1,330 | 2,390 | 1.7970 |
| Nov 1998. <br> Received $50 ~ S T 2 ~ L o y a l t y ~ s h a r e s . ~$ | 1,380 | 2,390 | 1.7319 |
| Nov 1999. <br> Received 60 ST A Loyalty shares. | 1,440 | 2,390 | 1.6597 |
| Nov 2000. <br> Received $50 ~ S T 2 ~ L o y a l t y ~ s h a r e s . ~$ | 1,490 | 2,390 | 1.6040 |
| Nov 2002. <br> Received 50 ST2 Loyalty shares. | 1,540 | 2,390 | 1.5519 |

For example, if the ST share price is $\$ 3.50$, then you would gain* $\$ 1.9481$ ( $\$ 3.50-\$ 1.5519$ ) for each discounted ST share sold.
*excluding brokerage fees and other fees
