Stroke</li> <li>5. Asthma</li> <li>6. Chronic Obstructive Pulmonary Disease (COPD)</li> <li>7. Schizophrenia</li> <li>8. Major Depression</li> <li>9. Dementia</li> <li>10. Bipolar Disorder</li> <li>11. Osteoarthritis</li> <li>12. Benign Prostatic Hyperplasia</li> <li>13. Anxiety</li> <li>14. Parkinson's Disease</li> <li>15. Nephrosis/Nephritis</li> <li>16. Epilepsy</li> <li>17. Osteoporosis</li> <li>18. Psoriasis</li> <li>19. Rheumatoid Arthritis</li> <li>20. Ischaemic heart disease (from June 2018)</li> </ol> <p><u>Approved Vaccinations</u> <i>Under the National Childhood Immunisation Schedule</i></p> <ol style="list-style-type: none"> <li>1. Hepatitis B</li> <li>2. Human Papillomavirus (HPV) (for female patients aged 9 to 26 years)</li> </ol>	<p>\$700 per patient per year (for patients with complex chronic conditions)</p> <p>or</p> <p>\$500 per patient per year (for non-complex chronic patients)</p>

3. Pneumococcal (PCV) (for patients below the age of five years old)
4. 5-in-1 combination vaccination covering Diphtheria, Pertussis, Tetanus, Haemophilus Influenzae type b, Inactivated Poliomyelitis
5. 6-in-1 combination vaccination covering Diphtheria, Pertussis, Tetanus, Haemophilus Influenzae type b, Inactivated Poliomyelitis and Hepatitis B vaccinations
6. Diphtheria, tetanus and acellular pertussis vaccine (Paediatric) (DTaP)
7. Tetanus, reduced diphtheria and acellular pertussis vaccine (Tdap)
8. Bacillus Calmette-Guerin (BCG)
9. Measles, Mumps and Rubella (MMR)
10. Oral Poliomyelitis vaccine (OPV)
11. Inactivated Poliomyelitis vaccine (IPV)
12. Haemophilus influenzae type b (Hib)
13. Influenza (for patients in recommended risk groups<sup>^</sup>)
14. Pneumococcal (PCV13/PPSV23) (for patients in recommended risk groups<sup>^</sup>)
15. Varicella
16. Measles, mumps, rubella, varicella vaccine (MMRV)
17. Tetanus, reduced diphtheria and acellular pertussis, Inactivated poliovirus vaccine (Tdap- IPV)

*Under the National Adult Immunisation Schedule (for target populations)*

1. Hepatitis B
2. Human Papillomavirus (HPV) (for female patients between the ages of 9 to 26)
3. Tetanus, reduced diphtheria and acellular pertussis vaccine (Tdap) (for pregnant women only)
4. Measles, Mumps and Rubella (MMR)
5. Influenza (for patients in recommended risk groups<sup>^</sup>)
6. Pneumococcal (PCV13/ PPSV23) (for patients in recommended risk groups<sup>^</sup>)
7. Varicella

<sup>^</sup>Patients are advised to discuss their vaccination needs and suitability to receive the recommended vaccines with their doctor.

Approved Health Screening

1. Mammogram (for female patients aged 50 and above)

For patients below the age of one year old

2. Hearing test
3. G6P deficiency screening

4. Metabolic screening 5. Thyroid function test	
Outpatient Flexi-MediSave	\$300 per patient per year  Only the patient's MediSave or the patient's spouse's MediSave may be used.  <i>Note: Both the patient and the spouse need to be 60 years old or older.</i>

\*You may use your MediSave to pay for your other dependants' (e.g. aunts') outpatient treatments incurred at public hospitals/ medical clinics, subject to eligibility conditions. For example, the patient must be a dependant of the MediSave Account (MA) holder who is still actively making contributions, and the patient has exhausted his own and his spouse, children, parents, grandchildren and siblings' MAs. The same prevailing withdrawal limits apply.

If you wish to find out if you are eligible to use your MediSave to pay for your other dependants' subsidised approved outpatient treatments at a public hospital or government polyclinics, you need to approach the staff at the hospital's Business Office or the polyclinic.

*Information is correct as at 10 March 2022*
