

Example: To receive a monthly payout of \$1,470 - \$1,570, you will need \$288,900 in your Retirement Account (RA) at 65. A much lesser sum of \$192,000 is required if you set aside the amount in your RA at 55. This is because CPF interest rates of up to 6% will help you grow your savings through compound interest.

Note:
 These monthly payouts are estimates based on the CPF LIFE Standard Plan, for members who turn 65 in 2032, computed as of 2022. Payouts may also be adjusted to account for long-term changes in interest rates or life expectancy. Such adjustments (if any) are expected to be small and gradual.
